ADAMS ELECTRIC FIREPLACE GRATES

WITH OR WITHOUT HEATING UNIT

Furnished in the following Finishes:

BLACK

SWEDISH—HAMMERED

ANTIQUE BRASS—HAMMERED

ADAMS ELECTRIC FIREPLACE GRATES

Electric Fireplace Grates are used for display purposes and those with heating units are popular in apartment houses.

Top and front of Adams Electric Fireplace Grates are covered with pieces of amber colored glass about the size of walnuts. The glass is placed on a fine wire screen which holds the glass in place. In the grate are two electric lamps and when burning the light shines through the glass and a revolving aluminum disk causes an impression of a glowing Fireplace Grate burning coal.

Electric Fireplace Grates are equipped with Globar heating element which is a guarantee of maximum heat and a minimum electric consumption.

These grates are equipped for 600 watt capacity, 110 volts, either direct or alternating current. At a small additional cost 1000 watt capacity can be furnished.

Grates are equipped with a detachable six foot asbestos covered heater cord with separate attachment plug, making easy connections with lighting fixtures.

STEEL SASH PUTTY

One Pound Cans	25c per can	Bulk	15c per lb.
----------------	-------------	------	-------------

PATENTS PENDING

BASEMENT WINDOW

CONSTRUCTION

The sash and frame are made from heavy rolled, special formed, solid steel. All joints are electrically welded, the corner joints being mitred and welded to insure perfect rigidity.

Extra strong cast brass hinges are secured to frame and sash with brass machine screws. The hinges are slotted, allowing the sash to raise and fall into position when closed. Frame engages sash in a manner which makes the window weatherproof, as it has a perfect water shed, a double seal and "dead air" space all around the sash.

Screen or wire guard may be easily attached as frame is provided with tapped holes for this purpose.

Anchor Angles are furnished and bolted to each frame.

FIRE PROOF
WEATHER PROOF
STRONG AND DURABLE
DO NOT WARP OR STICK

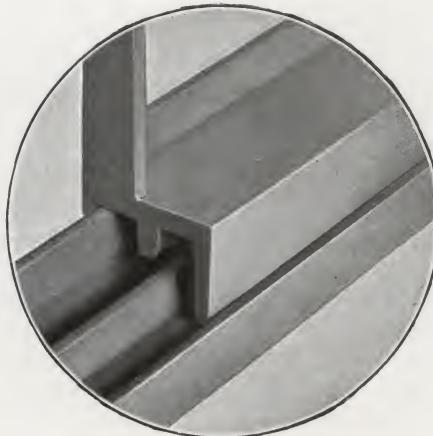

Illustration Shows in Detail
Special Formed Steel.
Weather Proof and Locking Feature.

ADVANTAGES TO HOME BUILDERS

1. Admit approximately 80% more light than wooden windows of same size.
2. Provide better ventilation — when open admit more air.
3. Use of steel windows greatly reduces fire hazard.
4. Installation cost is reduced to minimum as windows are set-up, fully equipped with hardware, ready to install as received.
5. Save time — mason does the entire work of installation, whereas, wooden windows require the services of a carpenter and painter as well.
6. They are painted dark blue grey before leaving the factory.
7. Adaptable to any type of construction, easy to set in frame, brick or concrete block walls.
8. Steel windows discourage meddlers and give more protection than wooden windows.

CONSIDERING THEIR MANY ADVANTAGES THE COST IS SURPRISINGLY LOW.

PATENTS PENDING

BASEMENT WINDOW

CONSTRUCTION

The sash and frame are made from heavy rolled, special formed, solid steel. All joints are electrically welded, the corner joints being mitred and welded to insure perfect rigidity.

Extra strong cast brass hinges are secured to frame and sash with brass machine screws. The hinges are slotted, allowing the sash to raise and fall into position when closed. Frame engages sash in a manner which makes the window weatherproof, as it has a perfect water shed, a double seal and "dead air" space all around the sash.

Screen or wire guard may be easily attached as frame is provided with tapped holes for this purpose.

Anchor Angles are furnished and bolted to each frame.

Illustration No. 5.

ADVANTAGES TO HOME BUILDERS

1. Admit approximately 80% more light than wooden windows of same size.
2. Provide better ventilation — when open admit more air.
3. Use of steel windows greatly reduces fire hazard.
4. Installation cost is reduced to minimum as windows are set-up, fully equipped with hardware, ready to install as received.
5. Save time — mason does the entire work of installation, whereas, wooden windows require the services of a carpenter and painter as well.
6. They are painted dark blue grey before leaving the factory.
7. Adaptable to any type of construction, easy to set in frame, brick or concrete block walls.
8. Steel windows discourage meddlers and give more protection than wooden windows.

CONSIDERING THEIR MANY ADVANTAGES THE COST IS SURPRISINGLY LOW.

Diamond Extension Fire Back

THE ONLY BACK WITHOUT BOLTS, WEDGES OR KEYS

Patented July 11, 1893.

CLOSED.

EXTENDED.

The "Diamond" was the first, and is to-day, the only Extension Fire Back in which the means for holding the extending parts are above the fire.

All the extending parts are held in a secure position without the use of bolts, wedges, or keys.

Extension Fire Backs have struggled for recognition for twenty years, but until these objectionable features were avoided by the "Diamond" no Extension Fire Back ever proved a success.

Packed $\frac{1}{2}$ doz. in a case. Weight—"A" size, per doz. 110 lbs. "B" size, per doz. 50 lbs.

STYLE "A"—Adjusts in width from $4\frac{1}{2}$ to 7 inches, in length from 15 to 20 inches.

STYLE "B"—Adjusts in width from $3\frac{1}{2}$ to 5 inches, in length from 11 to $15\frac{1}{2}$ inches.

The Adams Shoe Lasts and Stands are the best fitting goods on the market. Buy the **ADAMS GOODS** and then you will always be pleased and satisfied.

Adams Malleable Iron Shakers and Lifters

Combination Shaker and Lifter.

Crank Shakers for Duplex Grates

Made in one size only.

$\frac{3}{4}$ inch square hole.

Every dealer should carry an assortment
of these Shakers in stock.

HEAVY and STRONG.

Adams Iron Centers for Clothes Reels

There is no slender spindle to the cap of this reel to be broken.

This Cap cannot be broken, for the post supports it the entire length.

It is impossible to hold Cap to post if fastened with screws, particularly with a leverage on top to loosen the screws. We use a bolt, which is furnished with reel.

We could hold Cap easier with screws than others, but we prefer a bolt through the Cap and post so as to have all firm and strong, to stand the heaviest storms without loosening or breaking Cap.

Packed $\frac{1}{4}$ dozen in a crate, weight 50 lbs.

Packed 1 dozen in a barrel, weight 200 lbs.

Adams Malleable Iron Two-In-One Shakers Nickel Plated

Numbers Top Row Left to Right—
B12, B37, B33, B36, B21, B38.

Numbers Lower Row Left to Right—
B44, B35, B41, B16, 49, 43.

Every dealer should carry in stock and have for sale an assortment of both Adams Nickel Plated and Two-In-One Shakers.

With these lines of Heater Shakers dealers will be able to supply nearly every demand asked of them.

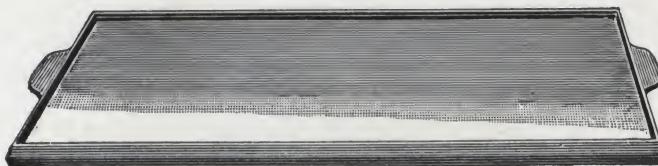

Packed 1 dozen assorted in package.

Adams Cake and Meat Griddle

Size 13½x25 inches. Weight 17 lbs.

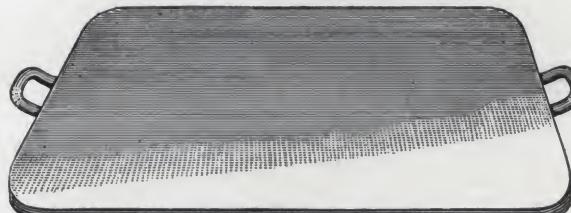

Reversible Cake and Meat Griddle

Size 13x25 inches. Weight 28 lbs.

Size 16x23—Weight 35 lbs.
Size 22x36—Weight 80 lbs.

Size 16x22—Weight 60 lbs. Planed and very highly polished.

Griddles

These griddles are heavy and strong. Extra well finished and especially adapted for hotel and lumbermen's purposes.

Adams Heavy Hotel Griddles

The Adams Flanged Hotel Griddle has polished face. Well made and heavy. These griddles are especially adapted for hotels and restaurants.

THE ADAMS FOLDING CAMP STOVES

Protects the fire from the wind and permits the camp fire being built anywhere.

Cooking may be done much faster than on an open fire, as the heat is retained. It is also a protection to the person using it. Can be set up securely and taken down instantly. Folds up into the size of the top about one inch thick. A substantial stove, made of sheet iron with heavy wire mesh or heavy bar top.
